

Western Digital® SSD Dashboard Release Notes

[Release notes for version 2.5.0.0 \(04/22/2019\)](#)

- Small initial setup file
- When SanDisk-branded SSD is being displayed, it uses same skin as SanDisk SSD Dashboard tool
- Add links to related 3rd party tool for convenient access
- Fixed recognition issues of older models

Known Issues:

- Gaming Mode is not available on a Win7 or Win8.1 In-box driver. This is a driver limitation and should be resolved with the installation of your chipset PCIe/NVMe driver
- NVMe devices under iRST 16.x driver do not support SMART

[Release notes for version 2.4.0.0 \(01/18/2019\)](#)

- Added Gaming Mode feature for WD Black SN750 NVMe SSD
- Now supports SanDisk-branded SSD's
- Added workaround for even more 3rd-party USB-SATA dongle hardware connectivity issues

[Release notes for version 2.3.3.0 \(10/12/2018\)](#)

- Added workaround for USB-SATA dongle hardware connectivity issues
- New drive program support
- New drive erase options based on drive capability and security state

[Release notes for version 2.3.2.4 \(6/29/2018\)](#)

- Fixed Internet connectivity detection issue on Wi-Fi connection

[Release notes for version 2.3.2.0 \(6/7/2018\)](#)

- Display PCIe speed and width for NVMe devices
- NVMe PSID Revert support
- Automatically update USB drive list when a USB drive is inserted
- Fixed bug relating to unresponsiveness in Windows 7

[Release notes for version 2.3.1.0 \(4/19/2018\)](#)

- Added support for Western Digital NVMe devices.
- Fixed issues with the UEFI USB key feature.

[Release notes for version 2.2.0.5 \(10/5/2017\)](#)

- Feature enhancements and minor bug fixes

[Release notes for version 2.2.0.1 \(9/22/2017\)](#)

- Update to support iRST requirements

[Release notes for version 2.2.0.0 \(8/1/2017\)](#)

- Feature enhancements and minor bug fixes

[Release notes for version 2.0.1.0 \(8/1/2017\)](#)

- Added PCIe/NVMe support for the WD Black PCIe SSD

[Release notes for version 1.4.4.5 \(10/31/2016\)](#)

- Bug fixes related to firmware update/Secure Erase or Sanitize using the USB bootable drive if the BIOS was set to Legacy Mode
- Added enhancements for SMART attribute display

[Release notes for version 1.4.3.8 \(10/11/2016\)](#)

- Initial release

Supported Operating Systems

- Windows 7
- Windows 8.1
- Windows 10

Recommended drivers for WD Black PCIe SSD™ PCIe SSD

- Microsoft NVMe driver
- iRST 15.2.0.1020 or newer (excluding v15.2.15.1058)

Installation Instructions

- Download Western Digital SSD Dashboard Installer from wdc.com
- Double-click the WesternDigitalSSDDashboardSetup.exe file to install.
